

SUBJ: Keep up with every single to-do

Stay Organized. Stay Competitive.

With Houzz Pro, jobs that are organized and on track aren't just goals, they're business as usual. Powerful features like schedules, tasks, product selections, client and team communications, and so much more work together to make project management—dare we say—effortless.

Map, monitor, and tackle every moving part with our schedule tool. Three levels of detail let you zoom out to see the big picture, then drill down to each task. Product delays? No problem, just adjust the delivery date and watch your dependencies move with it.

Houzz Pro also has centralized communication and unlimited cloud storage so your inbox doesn't play the role of virtual filing cabinet. When you and your team send messages from the project dashboard, every client exchange (yep—attachments, too) is documented in one place.
